EXPERIENCE

Software Engineer 09/2023 - Present
viaPeople San José, Costa Rica

- Designed and developed a scalable **chat-like AI applications** leveraging **GPT-4 via Azure AI Services** to query internal customer data from the Core Platform, building the backend with **TypeScript and Node.js**, the frontend with **React**, and managing a **PostgreSQL** database using Prisma ORM.
- Engineered a chunking mechanism for the scalable **chat-like AI application**, capable of processing consultations up to 1M tokens, optimizing the handling of large data queries.
- Implemented **secure multi-client view layers** in the shared **PostgreSQL** database for tenant-level isolation inside our AI application, ensuring data integrity and privacy across clients.
- Managed the full **AWS infrastructure** for the scalable chat-like AI application across development, QA, and production environments, including Firebase Authentication and CI/CD pipeline setups.
- Enhanced AI-generated performance summaries by integrating **AWS Bedrock** alongside **Azure AI Services**, providing clients with **flexible data retention options** and optimizing performance through model selection and caching.
- Developed customizable performance review solutions on the **Core Platform** using **Java, MSSQL, HTML, CSS, and JavaScript**, relying on advanced **SQL** for dynamic form configuration and complex business logic.
- Conducted thorough **code reviews**, managed **pull requests**, and actively **mentored** junior developers while participating in **Agile ceremonies** such as **daily standups, retrospectives, and sprint planning using Jira**.

Software Developer Intern 01/2023 - 05/2023
Cream Analytics San José, Costa Rica

- Completed comprehensive training in **Spring Boot, Java, and Angular** to build foundational skills for backend and frontend development.
- Collaborated with mentors in an Agile environment, using **Jira** to track progress and meet weekly deliverables.
- Renamed Java endpoints and refactored Unit Tests, enhancing code readability and test coverage.
- Developed and deployed **REST APIs** using **Java** and **Spring Boot**, contributing to new system functionalities and improving overall system reliability.
- Created interactive **real-time graphs** for customer ratings, designing both backend endpoints and UI components in **Angular** to provide dynamic data visualizations.
- Trained on **Flyway** migrations with **PostgreSQL**, optimizing database workflows for seamless version control and schema management.

EDUCATION

Bachelor's degree, Software Engineering 2021 - 2024
Universidad Cenfotec San José, Costa Rica

- Honorary mention** awarded for academic excellence.
- Completed four progressively challenging capstone projects that simulated real-world working environments, involving the full software development lifecycle from requirements gathering to deployment.
- Project - 1:** Built a **Food Delivery** application using **HTML, CSS, JavaScript, and Node.js**.
- Project - 2:** Developed a **Car Rental** application using **.NET, HTML, CSS, and JavaScript**.
- Project - 3:** Created a **Startup Funding** application using **Angular** and **Spring Boot** for dynamic user interfaces and backend functionality.
- Project - 4:** Designed a **trip planning** web (MERN) and mobile (Kotlin) application using **MVVM architecture** and integrated **OpenAI technologies** for personalized travel suggestions.

AWS Solutions Architect: Boot Camp 03/2025
Infosec New York, United States

- Trained in **AWS cloud architecture**, covering infrastructure optimization, security, and best practices.
- Learned how to design **scalable, reliable, and cost-effective AWS solutions**.
- Prepared for the **AWS Certified Solutions Architect - Associate exam**.

LANGUAGES

Spanish	Native
English	Bilingual

SKILLS

Programming Languages: • Java • Python • Javascript • Typescript • C# • Kotlin

Frameworks / Libraries: • React • Angular • Node.js • Spring Boot • Express • Jest • JUnit

Databases: • PostgreSQL • MSSQL • MySQL • PL/SQL

Tools: • Git • Docker • AWS • Firebase • Azure • Supabase

SOCIAL

PROJECTS

Project TF

01/2024 - 04/2024 Alajuela, Costa Rica
Inventory Management Application

- Developed an application using Spring Boot and Angular.
- Integrated AWS services for scalability and real-time inventory tracking.
- Implemented RESTful APIs and Docker deployment for efficient workflow.

Project DevTrail

10/2024 - 01/2025 Alajuela, Costa Rica
Personal Portfolio Application

- Created a Next.js - React-based dynamic portfolio showcasing projects, courses, and certifications.
- Improved deployment efficiency through automated CI/CD pipelines using AWS cloud integration.

Project Uniquora

01/2025 - Present Alajuela, Costa Rica
E-Commerce Application

- Designed and implemented a Java and Spring Boot backend with vertical architecture approach
